Subject: SFS-16-57 Verification 2015-2016 Non-Response Rate

The 2015-2016 verification non-response rates have been posted to the CNP website. The verification method to be used for School Year 2016-2017 is dependent on the non-response rate from School Year 2015-2016. School food authorities with a non-response rate of less than 20% may use any verification method [standard, alternate 1 (random), alternate 2 (focused)] in school year 2016-2017. School food authorities with a non-response rate of 20% or greater must use the basic method for verification in School Year 2016-2017.
